Combo kit: All-in-one solution. Get the O3 Samson CM15P gooseneck microphone + B2 connector kit.

Solutions for moving

Wheels version
This lectern has a version with wheels to move the lectern around using our tilt-back wheels system.

Dolly (H1)
Drop the no-wheels version of this lectern on this dolly and easily move your podium from one room to another.

Tilt-back wheels (H2)
Replace your lectern's base plate with a tilt-back system and transform your lectern into the wheels version.

Solutions for protection

Dust cover (F1)
Protect your lectern from dust and most scratches.

XLR Audio Cable (N25)
Use this 8m (25') XLR audio cable to connect the lectern to your sound system.

Solutions for wiring

Customization

The Simplest and Most Powerful Customization System

Customization

Fully customize your lectern, anytime

Easily customize your lectern by getting one or more modules, from a microphone connector to a power outlet.

How does it work

The Most User-Friendly Customization System

You get complete control: we have prepared the lectern's top shelf with 2 to 4 slots that can accept any install-yourself module + a central location for a reading lamp. You decide what you want to install and where you install it.

Installation of any module is a snap! No technical skills required, no drilling, no welding.

A welcomed relief

No technical headaches, customize anytime

Everything is simpler: You can adapt to any changes. No headaches on your actual needs and no guessing about your future needs! You will always be able to configure the lectern.

No obligations

Don't need any customization? You are still covered

Blank plates neatly covering the slots are included with any lectern. Your lectern always looks sharp and nice.

Check the lectern's description to see how many modules it can accept (The Y5 lectern can not accept install-yourself modules).
